

It's time to renew your Maintenance Subscription

Your Maintenance Subscription is coming to an end—but it doesn't have to! Contact your reseller today, and let them know you're ready to renew. In case you need a refresher, here are just a few of the top benefits you receive as a Maintenance Subscription customer.

> Get the latest software releases for less

You need to predict software costs for budgeting purposes, and want to control costs to stay within your budget. Staying current with your Maintenance Subscription lowers your upgrade costs—even if you don't typically upgrade your software with each new release. And your costs are fixed, so managing your software budget is easier and more predictable.

And, the value of Maintenance Subscription will continue to grow. Beginning in February 2015, upgrades to the latest software releases will only be available to customers with Maintenance Subscription.

If you're planning to upgrade your design software in the next five years to stay competitive, connect with your Autodesk Authorized Reseller today to help you determine payback timelines when you renew your Maintenance Subscription.

Latest software releases

> New product enhancements keep your tools current and skills sharp

Whether you're growing your teams or trying to do more with a smaller workforce, maintaining consistently high levels of productivity is critically important. Leading edge work demands leading edge software; software that makes you faster and more competitive. With a Maintenance Subscription you get access to the latest updates and product enhancements for your software as soon as they're released*. Continuous access to the latest Autodesk design tools and cloud services enables you to accomplish tasks that are simply not possible with outdated technology, helping you to consistently maintain a competitive edge.

Flexible licensing rights

> Flexible licensing rights help you stay nimble

When collaborating across internal and external teams, you need the right software on hand at the right time and place. And clients often dictate which software version must be used. Flexible licensing rights—including previous version rights, home use rights, and extra territory rights—give you the tools you need, where you need them. These licensing rights enable you to access both current and earlier versions of your software, switch between your office computer and home computer, and work from anywhere outside your country of purchase for up to 90 days.

> Cloud-based tools preserve your extended workflow

You need to visualize, optimize and share more design options with team members and clients in various locations. Maintenance Subscription helps you increase mobility, streamline collaboration, and optimize and analyze designs through privileged access to a variety of cloud-based services**. These services utilize the virtually infinite power of the cloud to run complex and resource-intensive tasks—such as design optimization, analysis, and rendering—without tying up your desktop.

Cloud benefits

> Stay productive with technical support at your fingertips

When issues arise, you need quick resolution to minimize downtime and keep your projects on track. With a Maintenance Subscription, you can choose a technical support plan that's tailored to your needs—from tutorials to community forums to dedicated support specialists.

> Management tools to monitor your investment

Managing software licenses, versions and usage can be difficult and time-consuming. Online Maintenance Subscription reports and management tools for your specific contract give you greater visibility into your organization's contract status, cloud credit usage, and software and support needs. Now you can spend more time working and less time managing software.

Put Maintenance Subscription to work for your organization! Contact your reseller today.
