

Top reasons to use Maintenance Subscription

The smart choice for a great value

Maintenance Subscription is the only way to maintain and maximize your perpetual software license. Stay current with the latest releases, and reap the benefits of flexible licensing rights, select cloud services, support and e-learning.

> Access to the newest Autodesk technology and design tools

Put the latest software releases and product enhancements right at your fingertips

Maintenance Subscription enables you to stay current with new Autodesk product features built to help increase your productivity. It's a cost-effective and convenient way to keep your Autodesk software up to date and provide you with access to the newest Autodesk technology and design tools for that software.

Maintenance Subscription provides you with access to the latest software releases you are licensed for, as well as any enhancements to those products that are released periodically.* As soon as Autodesk software upgrades are available for both stand-alone products and suites, you can access them through Autodesk Account, a password-protected portal.

> Flexible access that fits the way you work

Get the Autodesk software you need, wherever you need it

Remote working is increasingly common, which is why it's important to have the ability to install it on your home and office computers and use it in multiple locations - in addition to having access to both previous and current versions of your software to ensure compatibility across your team.

Having quick access to previous versions of Autodesk software also means you can be prepared to work with customers who aren't using the latest Autodesk technology in their projects. Maintenance Subscription features licensing rights like Home Use Rights, Global Use Rights, and Previous Version Rights, so you can have the right tools at the right time, wherever your location.**

> Extend workflows to the cloud

Work more efficiently with Autodesk cloud services

A Maintenance Subscription for a stand-alone product or suite gives you privileged access to a variety of Autodesk cloud services for rendering, analysis, and more. These can help you save significant time in your design process by enabling you to work more efficiently.

With Autodesk Rendering in A360, for example, you can create more photorealistic images and panoramas of your designs without spending countless hours tying up your desktop.

> Increase flexibility and improve collaboration

Gives you the freedom to work wherever business takes you

The freedom to work wherever business takes you—or where you're most effective. As a Maintenance Subscription customer, you are provided 25 GB of cloud-based storage space per Named User, so you can complete more computing-intensive tasks in the cloud. And by storing your design documents in the cloud, you can access files online anytime, anywhere you have an available Internet connection.

➤ Support when you need it

Resolve issues and keep projects on track with expert support services

The Maintenance Subscription program includes Basic Support, which connects you to Autodesk product support specialists who can assist with installation, configuration, troubleshooting, and other needs—helping you reduce downtime and increase your productivity.

You also receive access to online support that includes a knowledge base with help documents, tutorials, training videos, e-learning, and the opportunity to search an extensive collection of Autodesk technical solutions and online community support forums. One-to-one support for issues requiring privacy also is included with Maintenance Subscription.

Access to exclusive newsletters and communications

As a subscriber, you'll receive newsletters and communications with content exclusive for subscribers including announcements of product enhancements, tips and tricks to help you get the most out of your product and services, and customer stories that highlight how others are taking advantage of their subscriber benefits.
