Interactive experience
We go hands-on to work with the entire lifecycle of your documents.

On site
Our experienced consultants will come to your company.

Expert consultants
Our consultants have years of experience in the engineering world.

Manage, share & collaborate on engineering documents

One of the biggest challenges of engineering document management is finding the right software tools – tools that not only allow you to work collaboratively, but also help you avoid costly design mistakes or unnecessary engineering change orders.

We all know that depending on the size of the project, a multitude of documents and versions will be generated throughout the review and approval process. Tracking these documents and versions can be a nightmare, especially if mistakes are made at crucial milestones that prove detrimental to the success of your project. If approvals are missed, that means contract terms are unfulfilled, and, more importantly, costly deadlines get lost in the mix.

Cadac Group is happy to announce that we are now offering workshops to help your team make the right choice when it comes to selecting an engineering document management and control solution.

Cadac Organice DCS is a document management and control solution that helps project-driven engineering industries - including oil and gas; mining; process and power; equipment manufacturing; building and construction - to manage, share, and collaborate on documents. Cadac Organice DCS is built upon more than 25 years of in-depth engineering and construction experience and is based on Microsoft SharePoint.

Who should attend
- Document Controllers
- Engineers
- Project Managers

What you will learn
Discover the possibilities of Cadac Organice DCS, the leading engineering document management and control solution based on Microsoft SharePoint.
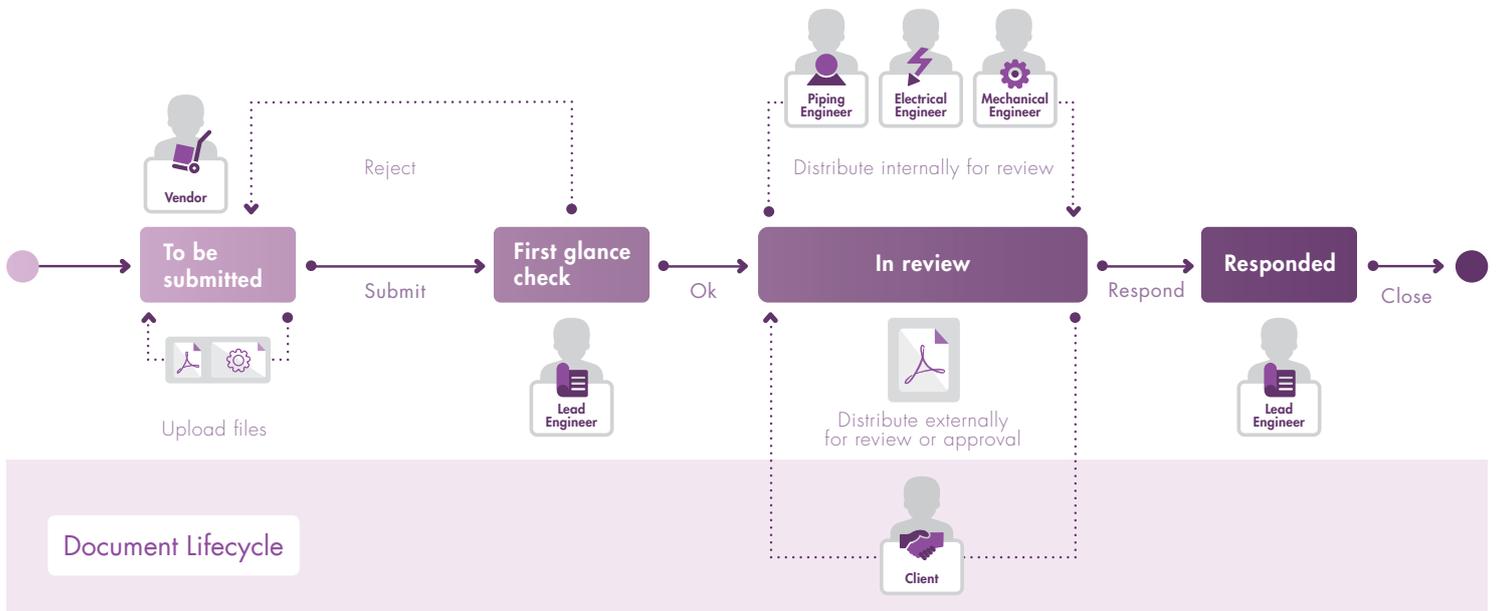

- Manage, share, and collaborate on engineering documents.
- Learn best practices your organization can implement during the engineering document review process.
- Control the process of engineering documents generated during the approval process between internal and external stakeholders.

Location
The workshop will take place at your location, this makes it easy for your team to participate.

Number of attendees
The maximum number of attendees is 8.

Lead Engineer

Agenda

The workshop will provide participants with a hands-on tutorial of Cadac Organice DCS, a complete engineering document management and control solution. You will have the opportunity to interact with the application while playing out the roles of positions that are significant to the engineering document review process.

10:30am	Introduction
11:00am	Cadac Organice DCS Live Experience
02:00pm	Wrap-up and next steps
02:30pm	End of workshop

Cost

The total cost for the workshop are € 1.100,00.

How to schedule a workshop

Contact us to schedule a call with one of our knowledgeable account managers to discuss your requirements and schedule a workshop at your location.
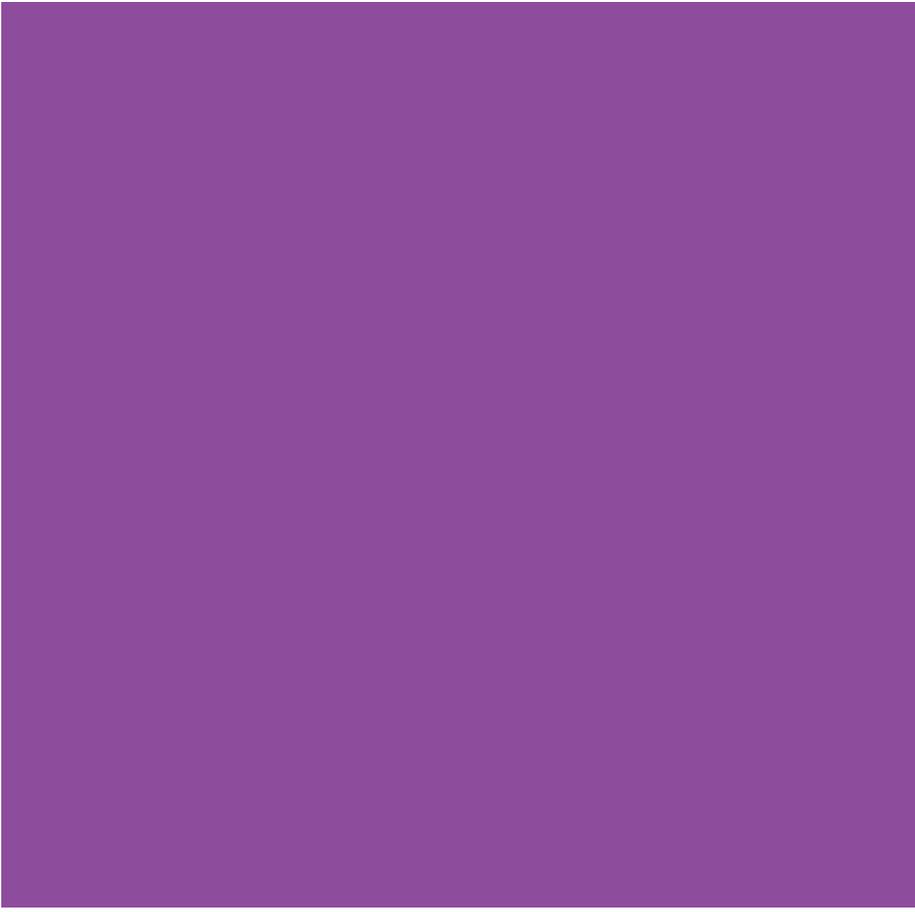

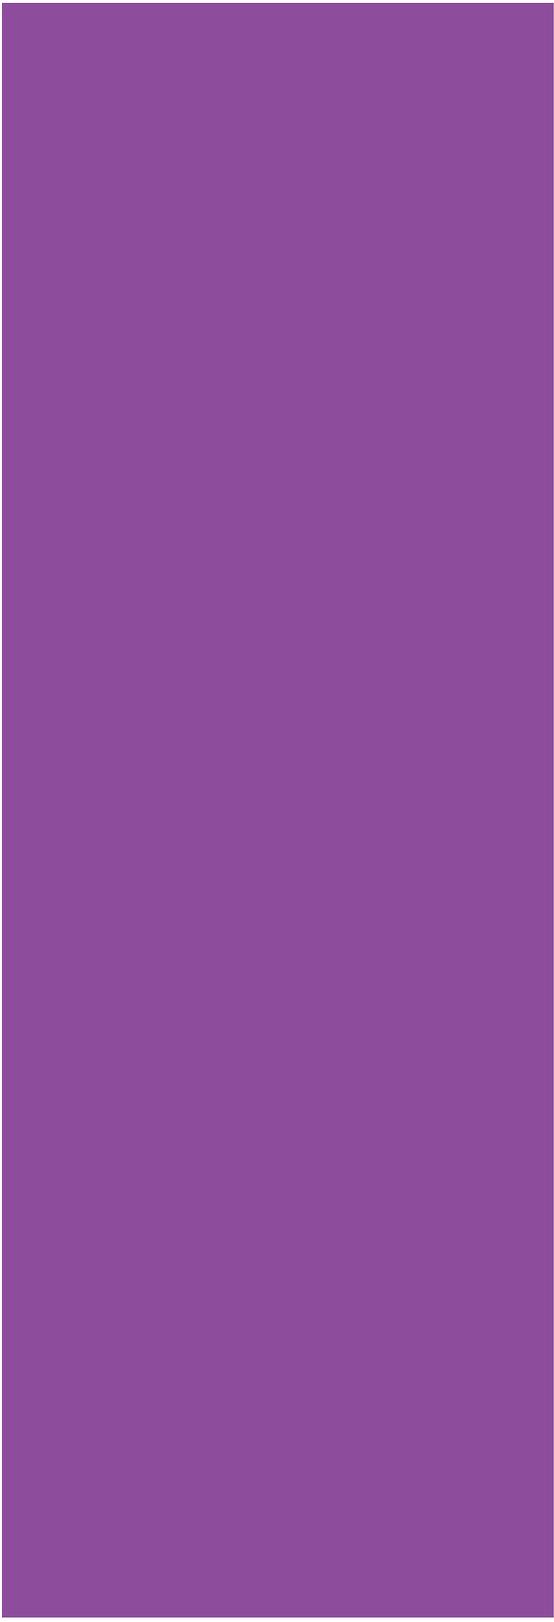

Hands-on workshop

During a half-day workshop, your team will have the opportunity to work with one of our expert consultants. The Cadac Organice DCS expert will take you and your team through a document lifecycle that is based on a real-life engineering process. This will give your users immediate, hands-on experience with the leading engineering document management and control solution on Microsoft SharePoint.

As the consultant guides participants through the workshop, each person will have the ability to actively participate in processes specific to his or her role. This role-playing exercise makes it simple for the user to see how the software helps with everyday responsibilities. And because we come to your location, it is easy for your team to participate.

Our consultants are experts in the engineering field and most come to Cadac Group with an engineering background, so they will be prepared to answer questions and relate the standard best-practice situation to your specific requirements. They can also discuss which options of the Cadac Organice DCS solution can be customized to work best for your company. Together with your account manager, they will provide an interactive experience that encourages conversation and questions so you are left with the answers and the information you need.

This workshop is a great opportunity for companies that are considering implementing Cadac Organice DCS within their organization. It is also perfect for sceptical or apprehensive companies that have already invested in another document control system that is not working and want to be sure they are getting everything they need from Cadac Organice DCS.
