Brief introduction

Discover the advantages of our solution in just half a day.

On site possible

It is possible for our experienced consultants to come to your company.

Interactive experience

Each participant can actively take part in processes specific to his or her role.

Experienced experts

Based on years of experience in the engineering field, we have developed several best practices for your industry.

Manage the data generated from engineering documents

One of the biggest challenges of today's technical environment is finding the right information in the maze of existing documentation. Locating and using the right information will avoid costly maintenance mistakes or unnecessary engineering change orders.

During a technical project, a lot of data is generated with a multitude of different project documents. Finding the data you need or tracking the changes to this data can be a nightmare, especially if the data is repeatedly used in different documents. If information is missed or overlooked it is possible that contract terms won't be met, and more importantly, costly deadlines are put at risk.

Cadac Organice TagHub.

Cadac Organice TagHub is a data management solution that helps project-driven engineering industries – including oil and gas, mining, process and power, and equipment manufacturing – to manage the data generated from different documents. The Cadac Organice TagHub solution is based on more than 25 years of in-depth engineering and construction experience and is available in an Owner-Operator version and an Engineering-oriented version.

In order to help your team make the right choice when it comes to selecting a data management solution we offer workshops in which your team will get hands-on experience with Cadac Organice TagHub.

Who should attend?

- Document Controllers
- Engineering Managers
- Project Managers
- Maintenance Managers
- Quality Controllers

What will you learn?

- Discover the possibilities of data publication and control with Cadac Organice TagHub.
- Gather and publish data generated from different engineering documents.
- Learn how you can save valuable time finding the right information when you need it.
- Manage change and quality of data from multiple data sources.
- Learn how to use scanned and legacy data in your current process

Location

It is possible to organise the workshop on site. This makes it easy for your team to participate.

Number of attendees

The maximum number of attendees is eight.

Agenda

The workshop will provide participants with a hands-on tutorial of Cadac Organice TagHub, a data publication and control solution. You will have the opportunity to use the software, while role-playing the positions that are significant in the engineering process.

10:30 AM	Introduction
11:00 AM	Cadac Organice TagHub Live Experience
14:00 PM	Wrap-up and next steps
14:30 PM	End of workshop

Cost

The total costs for the workshop are € 1,100.00.

How to schedule a workshop

Contact us to schedule a meeting to discuss your requirements and wishes and to schedule a workshop at your location.

Hands-on workshop

During a half-day workshop, your team will have the opportunity to work with one of our expert consultants. The Cadac Organice TagHub expert will guide you and your team through a practical process, based on your daily information needs. Your users will have immediate, hands-on experience with the solution and its everyday use.

As the consultant guides participants through the workshop, each person will have the ability to actively participate in processes specific to his or her role. This role-playing exercise makes it easy for the user to see how the software helps with everyday tasks and responsibilities.

Our consultants are experts in engineering with many years of experience, so they are able to answer your questions and connect the standard best-practice situation to your specific requirements. You can also discuss which options of the Cadac Organice TagHub solution can be customised to benefit your company's needs. Together with your account manager, our consultants will provide an interactive experience that encourages conversation and questions so you get all the answers and information you need.

This workshop is a great opportunity for companies that are considering implementing Cadac Organice TagHub in their organisation. It is also perfect for companies who are interested in the benefits of Cadac Organice TagHub and would like to learn more.
